

Blood Typing Lab

DATA: Complete the table for the blood test results--**agglutination** is “clumping”.

Colour in and sketch the results in this table:

Name of person being tested				
Blood test results	<input style="width: 40px; height: 40px; border: 1px solid black;" type="text"/> A	<input style="width: 40px; height: 40px; border: 1px solid black;" type="text"/> A	<input style="width: 40px; height: 40px; border: 1px solid black;" type="text"/> A	<input style="width: 40px; height: 40px; border: 1px solid black;" type="text"/> A
	<input style="width: 40px; height: 40px; border: 1px solid black;" type="text"/> B	<input style="width: 40px; height: 40px; border: 1px solid black;" type="text"/> B	<input style="width: 40px; height: 40px; border: 1px solid black;" type="text"/> B	<input style="width: 40px; height: 40px; border: 1px solid black;" type="text"/> B
	<input style="width: 40px; height: 40px; border: 1px solid black;" type="text"/> Rh	<input style="width: 40px; height: 40px; border: 1px solid black;" type="text"/> Rh	<input style="width: 40px; height: 40px; border: 1px solid black;" type="text"/> Rh	<input style="width: 40px; height: 40px; border: 1px solid black;" type="text"/> Rh

RESULTS:

Write in Transparent (No clumping) or Opaque (Clumping) and decide on the blood type of the person.

Sample (Name)	Anti-A serum	Anti- B serum	Anti- Rh serum	Blood Type
