

## Blood Circulation Through The Heart

### Necessary Info:

Oxygenated blood = RED = RBC plus Oxygen

Deoxygenated blood = "Mauvey" = RBC minus Oxygen

**Artery** = blood vessel that carries blood **AWAY** from the heart

**Vein** = blood vessel that carries blood **TOWARDS** the heart

### On the 2 heart diagrams:

- i) On the **first** heart diagram--**colour** the **arrows** showing the direction of flow of the blood through the heart--use **red** and **blue**.

**Label** all the parts.

Start memorizing the parts for Monday.

- ii) We will use the second one on Monday morning together as a class.
