

Clinical Trials Ethics Assignment #1

Clinical trials are already underway for Covid 19 vaccines.

What is the ethics of clinical trials?

Please watch the following video:

<http://www.ecranproject.eu/en/content/sail-along-james-lind>

Please answer the following:

- 1) In scientific research, how do you know if a new “intervention” is working?
- 2) Who participates in clinical trials? Are there problems with the way participants are chosen? What is the ethics of choosing participants??
- 3) Do clinical trials provide strong evidence? Is there bias?
- 4) Where would you go to find evidence?
- 5) How would you know if a new intervention works?
- 6) How do scientists set up the clinical trials to ensure that other researchers would be able to get the same answer?
- 7) Would you ever participate in a clinical trial--why or why not?
